

# PONDLYFE AERATION SYSTEMS

## Clean, Healthy Pond Water

Vertex aeration is the better choice for the environment and your wallet. It reduces the need for chemicals to combat the many problems caused by low oxygen, muck and high nutrients.

Microorganisms, plants, fish and other animals in your pond need oxygen to live, and nature may not be providing enough to keep everything healthy and in balance. Vertex aeration systems have been shown in INDEPENDENT TESTING to aid in pond restoration by adding oxygen to the water at all depths.

## Benefits of Aeration

- ◆ Decreased algae growth
- ◆ Elimination of foul odors
- ◆ Clearer water
- ◆ Reduced muck
- ◆ Healthy fish population
- ◆ Diminished midge fly swarms
- ◆ Higher oxygen at all depths
- ◆ Balanced ecosystems
